Ka-band

The fastest internet connectivity worldwide.
Available for new Global aircraft and for retrofit on in-service Global aircraft.

Ka-band

Delivering the fastest internet connectivity worldwide*, Ka-band keeps you informed and entertained wherever your travels take you. You can video conference, stream movies and share large files. The Ka-band capabilities onboard Global aircraft will exceed your highest expectations.

WORLDWIDE COVERAGE

Leveraging the latest Ka-band satellite technology, Global aircraft are now equipped with an internet connectivity designed to match the range of the Global aircraft family.

FASTEST CONNECTIVITY

Featuring the fastest internet connectivity worldwide, Ka-band enables video conferencing and movie streaming. With multiple data package options available, clients can select the right speed for their needs. Passengers will be as productive in-flight as in the office and free to enjoy their favourite entertainment seamlessly.

PERFORMANCE COMMITMENTS

Ka-band is unbeatable in terms of speed, coverage and reliability. To illustrate the confidence in the service, the Ka-band packages are backed by performance commitments offered by the leading service providers.

CONNECT, STREAM, WATCH & COMMUNICATE

With Ka-band, users can enjoy the following activities while in flight or on the ground:

- Video conferencing
- Internet TV
- High-definition video streaming
- Video on demand
- Large file upload and download

When used in conjunction with compatible Cabin Management Systems onboard Bombardier aircraft, the system offers the possibility to relay content throughout the cabin for an immersive entertainment experience.

HARDWARE

The system is powered by Honeywell's JetWave™ hardware and Inmarsat's Jet ConneX™ service.

PLATFORM SUPPORT

Ka-band is currently available on new Global 5000, Global 6000, Global 7500 and Global 8000 aircraft, as well as for retrofit on in-service Global Express, Global Express XRS, Global 5000 and Global 6000 business jets.
